

## **NOTE**

**The W.H. Sammis Power Station North and South Surface Impoundments Notice of Groundwater Protection Standard Exceedance dated February 13, 2019, did not indicate the Appendix IV constituent that was detected at a statistically significant level above groundwater protection standards. A revised notice, dated April 5, 2019, identifies the constituent.**

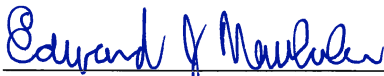

**The revised notice, dated April 5, 2019, immediately follows this page. The last page is the original notice.**
