

Former Riverton Pond B

**Notification of Field
Investigation Conclusion**

**Potomac Edison Company
Former Riverton Power Station
Warren County, Virginia**

This notification of field investigation conclusion has been prepared on behalf of Potomac Edison to meet the requirements of 40 CFR 257.100(f)(1)(iii)(F). The purpose of this notification is to provide notice that it has been determined, through field investigation, that the Former Riverton Pond B, owned by Potomac Edison at the former Riverton Power Station does not contain both CCR and liquids. Therefore, the Former Riverton Pond B does not meet the definition of a legacy CCR surface impoundment.

Applicability Extension Reports were previously developed in accordance with the requirements of 40 CFR 257.100(f)(1)(iii) for the Former Riverton Pond B and placed in the facility's operating record and posted to a publicly accessible website. Field investigation workplans were included within those Applicability Extension Reports to address identified data gaps. This notification was developed based upon the findings from the field investigations.

Potomac Edison has prepared this notification and shall place it in the facility's operating record, post it to a publicly accessible website and notify the state as required by 40 CFR Sections 257.105(k)(3), 257.106(k)(3), and 257.107(k)(3).
